### OBJECTIVES AND INVESTMENT POLICY

The fund is a fixed income fund with an average duration of between 2 and 10 years. The fund's assets are invested in fixed income securities and money market instruments issued primarily by governments, mortgage institutions and companies, and in bank deposits.

The fund may invest in derivative instruments as part of its investment strategy. Assets are to be denominated in SEK.

The fund's objective is to achieve a good return in the medium-term.

The fund is actively managed. Deviations from its benchmark can vary over time, please read more in the fund's information brochure or its annual report for historical variations. Investments are made on an objective basis taking account of developments in fixed income markets, the fund's risk limits and the manager's risk assessment of issuers permitted by the investment strategy.

The fund is using certain sustainability criterias. Please, read more on our website or in the fund's information brochure for a complete information regarding our sustainable investments.

We compare the fund's performance with the benchmark HMSC (Handelsbanken Markets Sweden All Bond Index) from 1 October 2012; previously HMSA (Handelsbanken Markets Sweden All Government Bond Index).

The fund does not distribute dividends.

Units can normally be bought and sold on any working day. Days on which trading cannot take place are shown in the fund's trading calendar, available at [www.amf.se/fonder](http://www.amf.se/fonder).

Recommendation: this fund may not be appropriate for investors who plan to withdraw their money within 2-3 years.

### RISK AND REWARD PROFILE

The risk/reward indicator illustrates the trade-off between risk and potential returns when investing in the fund. The indicator is based on how the fund's value has fluctuated over the past five years.

This fund is in risk category 2, which entails a limited risk of both increases and decreases in unit value. Category 1 does not mean that a fund is risk-free. A fund may move along the scale over time, to both the right and the left. This is because the indicator is based on historical data, which are no guarantee of future risks/rewards.

The risk scale illustrates the level of exposure to the fund's most significant risks. It does not illustrate the risk of:

The risk scale illustrates the level of exposure to the fund's most significant risks. It does not illustrate the risk of:

Liquidity risk: can arise if some of the fund's assets are difficult to sell at a certain time or at a reasonable price. The fund's assets are invested to some extent in the corporate bond market, which has lower transparency and liquidity than the stock market. The liquidity risk in the fund's holdings is continuously monitored by the fund company.

Credit risk: The risk of loss if the issuer of a fixed-income security is unable to make coupon payments or repay the principal on maturity.

Operational risks: Delays and errors in processes, political decisions, official decisions and so on may impact negatively on the fund.

Impact of financial techniques: Derivative instruments may be used for investment purposes, which may increase the fund's risk levels.
