AMF Aktiefond Småbolag

ISIN: SE0001185000

The Fund is managed by AMF Fonder AB, corporate identity number 556549-2922, a subsidiary of AMF Tjänstepension AB

OBJECTIVES AND INVESTMENT POLICY

The fund is an equity fund focusing mainly on small- and medium-cap companies in Sweden. Up to 25 percent of the fund may be invested elsewhere in the Nordic region. The fund may invest in other funds and in money market instruments and bank deposits, but at least 85 percent of the fund must be invested in the stock market. Derivative instruments may be used to make the management of the fund more efficient.

The fund's objective is to achieve a return in excess of its benchmark, by using a well diversified portfolio.

The fund is actively managed. Deviations from its benchmark can vary over time, please read more in the fund's information brochure or its annual report for historical variations. Investments are to focus on midcap or small cap companies which are considered undervalued and the holdings represent different types of business, and should be within the fund's risk limits.

The fund is using certain sustainability criterias. Please, read more on our website or in the fund's information brochure for a complete information regarding our sustainable investments.

We compare the fund's performance with the benchmark Carnegie Small Cap Return Sweden Index.

The fund does not distribute dividends.

Units can normally be bought and sold on any working day. Days on which trading cannot take place are shown in the fund's trading calendar, available at www.amf.se/fonder.

Recommendation: this fund may not be appropriate for investors who plan to withdraw their money within 5 years.

RISK AND REWARD PROFILE

The risk/reward indicator illustrates the trade-off between risk and potential returns when investing in the fund. The indicator is based on how the fund's value has fluctuated over the past five years.

This fund is in risk category 6, which entails a high risk of both increases and decreases in unit value. Category 1 does not mean that a fund is risk-free. A fund may move along the scale over time, to both the right and the left. This is because the indicator is based on historical data, which are no guarantee of future risks/rewards.

The risk scale illustrates the level of exposure to the fund's most significant risks. It does not illustrate the risk of:

The risk scale illustrates the level of exposure to the fund's most significant risks. It does not illustrate the risk of:

Liquidity risk: may occur if a part of the funds assets are difficult to sell at a certain point of time or at a reasonable price. The liquidity risk can be higher in the fund compared to other equity funds due to the fact that events in the stock market can have a more negative impact on liquidity for small cap equities. The liquidity risk in the fund's holdings is continuously monitored by the fund company.

Operational risks: Delays and errors in processes, political decisions, official decisions and so on may impact negatively on the fund.

Impact of financial techniques: Derivative instruments may be used to make the management of the fund more efficient, which will not increase the fund's risk levels.

CHARGES

One-off charges taken before or after you invest.
